Projects

Delivery Management System

www.thetariq.com/project-delivery-management

- Connected a sales platform, admin backend and courier APIs into one Google Sheet that validates gift and delivery data before dispatch and tracks status across 8,850 completed orders

Tacoscore

pypi.org/project/tacoscore

- Published a typed Python client and CLI for Sofascore's football analytics API to PyPI, with sync/async clients, built-in rate limiting and backoff, pandas export, and 132+ tests

Russian Vocabulary Facebook Automation

www.thetariq.com/project-russian-automation

- Built an n8n workflow that renders HTML posters to images with Puppeteer and publishes a scheduled, three-times-daily carousel to a client's Facebook page

Sales CRM System

- Built an end-to-end CRM in Google Sheets on API-extracted data, consolidating 15,000+ student records into a single, automated source of truth

Eid Card Mail Automation

www.thetariq.com/project-automate-mail

- Self-taught Apps Script mail merge, bulk send to personalised tokens to attachments, later extended with CC/BCC support for another project

Automated Image Generation

www.thetariq.com/project-image-generation

- Rebuilt bulk certificate generation around Figma auto layout and Variables driven by a Google Sheet; delivered a live, zero-cost certificate validation site for BRAC University Computer Club
